

Cavorite Development Roadmap

This document outlines the development plan from a high level and will be updated as progress is made. It should be noted that this roadmap applies only to the blockchain software and not to the other tools and utilities such as wallets and block explorers which will have their own teams and dedicated roadmaps once Phase 1 is complete.

Everything contained in this document is in draft form and subject to change at any time and provided for information purposes only. PINAKA does not guarantee the accuracy of the information contained in this roadmap and the information is provided “as is” with no representations or warranties, express or implied.

Q1 2019

CAVORITE Testnet launch,

CAVORITE POS Prototype & Developer Edition Launch

Q2 2019

Additional Asset Exchange transaction type improvements

Prepare for the migration of aliases, holdings, and account settings from the ethereum blockchain to the CAVORITE chain.

Q3 2019

During this phase the platform will undergo heavy testing with a focus on finding security issues and bug.

Attacking the network with spam, virtual machine exploits, and bug crashes, and non-deterministic behavior will be a heavily involved process but necessary to ensure that software is stable. Bounties will be organized for attacking the network

Q4 2019

CAVORITE Mainnet launch

Migration of CAVORITE balances from the Ethereum blockchain to Cavorite Genesis block.

CAVORITE POS Launch.

Research projects

Sharding implementation on CAVORITE blockchain.

Blockchain pruning.
